

Summer 2023 Math Assignment for Students

For most students, returning or new, the summer math assignment is to complete the Summer Skills Math Review Book for the grade just completed. Links to purchase are below.

Although Saint Peter's has an accelerated math curriculum, the goal of the summer math assignment is for students to **review basic math skills throughout the summer**. The material should be familiar; a student should be able to complete the math work independently.

Parents - once the books arrive, please tear out the answer key. Use it, after your child has completed a page, to check the work. Please also ensure that your child spaces the work out over the summer (complete 3-5 pages per week). The goal is practice throughout the summer to avoid the effects of summer learning loss.

If your child loves math, or they need to review a difficult concept, the free online site, Khan Academy, is a fantastic resource.

The completed workbook will be collected by the math teacher on the first day back next year.

Kindergarten students should complete the packet linked to the Summer Reading Assignment. Language and math review topics are included in that packet.
